PROFESSIONAL SUMMARY

Applied AI Engineer and Systems Architect pursuing a B.Tech in Artificial Intelligence & Machine Learning. Builds practical AI, cybersecurity, voice intelligence, and full-stack products from architecture through deployment. Experienced with AI inference APIs, backend systems, cloud infrastructure, product engineering, technical documentation, and early-stage venture execution.

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript, TypeScript, SQL | **Frontend:** React, HTML, CSS, Tailwind CSS, Flutter | **Backend:** FastAPI, Node.js, Express, REST APIs | **AI/ML:** Speech AI, voice deepfake detection, LLM integration, embeddings, vector search, model evaluation | **Databases & Cloud:** PostgreSQL, pgVector, Prisma, SQLite, Google Cloud, OCI, Render, Firebase | **Tools:** Git, GitHub, Postman, VS Code, Figma, DB Browser

EXPERIENCE & LEADERSHIP

Applied AI Engineer & Systems Architect — VoiceShield

Architected VoiceShield, a real-time AI-powered voice impersonation detection, prevention, and risk-assessment framework. Integrated Groq Speech-to-Text and Reality Defender detection APIs through FastAPI, and authored system architecture, SRS, demonstrator documentation, and multi-track engineering workflows.

Co-Founder & Full-Stack Developer — Dripzoid Technologies

Built and evolved a fashion-technology venture spanning e-commerce web, native mobile, automation, shipping workflows, media management, and AI-assisted shopping experiences. Led architecture, backend development, PostgreSQL/Prisma integration, cloud deployment, and product execution.

Team Lead / Full-Stack Developer — Dripzoid Dev Team

Coordinated frontend, backend, mobile, automation, and deployment workstreams while maintaining technical direction, integration quality, and delivery focus.

SELECTED PROJECTS

VoiceShield: Flagship independent AI cybersecurity project for real-time voice impersonation detection, prevention, and risk assessment; FastAPI, Groq Whisper-large-v3, Reality Defender RealAPI, and cloud-ready service architecture.

Dripzoid: Fashion technology ecosystem with a live e-commerce platform, Flutter mobile-app development, PostgreSQL/Prisma backend, Cloudinary, automation microservices, and shipping integration.

AskDrip: AI fashion assistant within Dripzoid using FastAPI, PostgreSQL with pgVector, sentence-transformer embeddings, and LLM inference for personalized fashion assistance.

ClimateTwin India: AI-powered digital twin concept for India's climate, developed for the Bharatiya Antariksh Hackathon 2026.

ACHIEVEMENTS & RECOGNITION

- VoiceShield received approval from the Entrepreneurship Development Cell and Department of Technical Trainings for project support and cloud resource allocation.
- Showcased VoiceShield at UTKARSH 2026 – InnoVision.
- Published an AWS Builder technical article series documenting VoiceShield's architecture, audio-processing challenges, routing, ensemble decisioning, and demonstrator progress.
- Competitive programming presence across LeetCode, CodeChef, HackerRank, Codeforces, and GeeksforGeeks.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning | Aditya College of Engineering and Technology, Surampalem | 2024–2028
